Writing

There are so a lot of documentary films nowadays. This kind of films is too interesting not only for old people but also for teenagers. But why?

Documentaries were made for people who like to take new knolege, be clever or just watch them for the fun.

You can find a lot of documentary films about nature, animals, sea world, space and etc. There are a lot of choices.

I prefer watch documentary films about culture of another countries because it is too interesting to know about foreign people, their sightseens and holidays. It is also good for my future job because I want to become a traveller. If you watch them for your future job you are a person full of education and interested in the world. And ~~Uhets~~ that is awesome.

People who ~~don't~~ do not like documentary films just make themselves boring and cleverless. With such persons you can not find same preferences.

If you want to become clever you should watch documentary films.
